

# Power Systems & Packaging Group

# Broken Arrow Electric Supply Power Systems & Packaging Group

BAES' **Power Systems and Packaging Group** is designed to support our industrial customers' projects, and our services are provided as a courtesy to our customers. We help engineers and end users achieve their project goals by providing engineering support, product knowledge, and project management.

We have Application /Electrical Engineers who can help the consulting engineer specify equipment that will meet the end user's needs. Our staff has extensive knowledge of Medium Voltage and Low Voltage Switchgear, Motor Control, Variable Frequency Drives, UPS, Power Transformers, LV Control systems, and Power Distribution Center Buildings that only comes through experience.

Our staff project manages the order and works as a liaison between manufacturers and the customer. We are your one point of contact for documentation and order management, regardless of whether your project involves a single Motor Control Center or multiple comprehensive Power Distribution Centers.

We are available for job walks, design/specification reviews, equipment suggestions, proposals, and factory support. Our team's dedication makes **Broken Arrow Electric Supply** the distributor you can count on.

**Broken Arrow Electric Supply**  
2350 W. Vancouver St.  
Broken Arrow, OK 74012  
918-258-3581

- Application Engineering Support
- Arc Flash Study Support and Training
- Arc Mitigation Equipment
- Battery Systems, Racks and Chargers
- Cable Bus Systems
- Cable Tray
- Control Panels
- Power Distribution Skids
- Enclosures – Control, Hazardous and Rack Mounted
- Generator Sets and Tap Boxes
- Hazardous Area Equipment and Panels
- High/Low Resistance Ground Systems
- Line and Load Reactors and Filters
- LV and MV Automatic Transfer Switches
- LV and MV Circuit Breakers
- LV and MV Fuses
- LV and MV Non Seg Busway
- LV and MV Power Wire and Cables
- LV Arc Flash Motor Control
- LV & MV Arc Resistant Switchgear
- LV MCC Buckets -Aftermarket
- LV Motor Control
- LV Panelboards
- LV Switch Racks and Switchboards
- LV Switchgear
- LV Variable Frequency Drive -VFD
- Metering Devices and Enclosures
- Molded-Case Circuit Breakers & Enclosures
- MV Arc Resistant Motor Starters
- MV Deadbreak Connectors and Bushing
- MV Disconnect Switch
- MV Metal-Clad and Metal-Enclosed Switchgear
- MV Motor Starters and Soft Starters
- MV Termination Kits
- MV Variable Frequency Drive - VFD
- Neutral Grounding Systems - NGR
- PLC Panels
- Potential and Current Transformers - VT/CT
- Power Distribution Buildings - E- House
- Power Factor Correction Equipment
- Power Quality Metering
- Protective Relays
- Surge Arrestor and Capacitors
- Transformer -Distribution Dry-Type
- Transformers – Pad Mounted
- Transformers – Substation
- Unitized Power Centers
- UPS Systems – Uninterruptible Power Supplies
- Utility Metering Enclosures
